

Frontiers of Geodetic Science (FROGS)

Submission
deadline:
May 15

**Call for
papers!**

@INTERGEO 2026

15. -17. September 2026 | Messe München

DVW e.V. – Gesellschaft für Geodäsie,
Geoinformation und Landmanagement

Current scientific developments in geodesy

This event is particularly aimed at staff from university and research institutes in the field of geodesy, as well as representatives from related disciplines and practitioners.

Core topics

1. Gravity Field: Why? And how?
2. Looking at the Earth from above: air- and spaceborne remote sensing
3. Engineering Geodesy: sensors and methods
4. Geoinformatics: how's AI doing these days?
5. Earth in motion: observation systems, reference systems, Earth rotation, geodynamics
6. Geodesy for climate research

Young researchers are especially encouraged to submit contributions to the Frontiers of Geodetic Science 2026.
